

# MUSSER SYMPHONIC CHIMES

## SYMPHONIC CHIMES

Musser Symphonic Chimes have all the same features as Classic Chimes but with 1.5" tubes for even greater volume and projection. Also available with polished or chrome plated seamless brass tubes, Symphonic Chimes offer the same choice of sound textures but with even more carrying power. Supplied with a rawhide mallet and mallet holder.

Musser Chimes come standard on a concert frame with 3" swivel casters and a pedal operated damper. For outdoor use, all chimes are available on an all terrain cart with 10" pneumatic tires. The all terrain cart features a hand operated damper that is normally "open".
